April 12, 1999

The undersigned would like to see the irradiation of all foods stopped. However, that does not seem like it will be a reality soon. We then demand the right to know if the food that we purchase has been treated with radioactive materials. We feel that foods altered in any way from their natural state should be labeled in a prominent place and in understandable, explicit english. This would prevent ourselves and others from purchasing products that are not exactly as we expect them to be. Our concerns are the changes radiation will have on the taste, texture, and nutrients of our foods.
